1. Introduction

The Novacab MDT is a mobile computer, made for handling of trips and vehicle logistics in a car as quick, simple and intuitive as possible.

2. Home tab

The Home tab consists of the following elements:

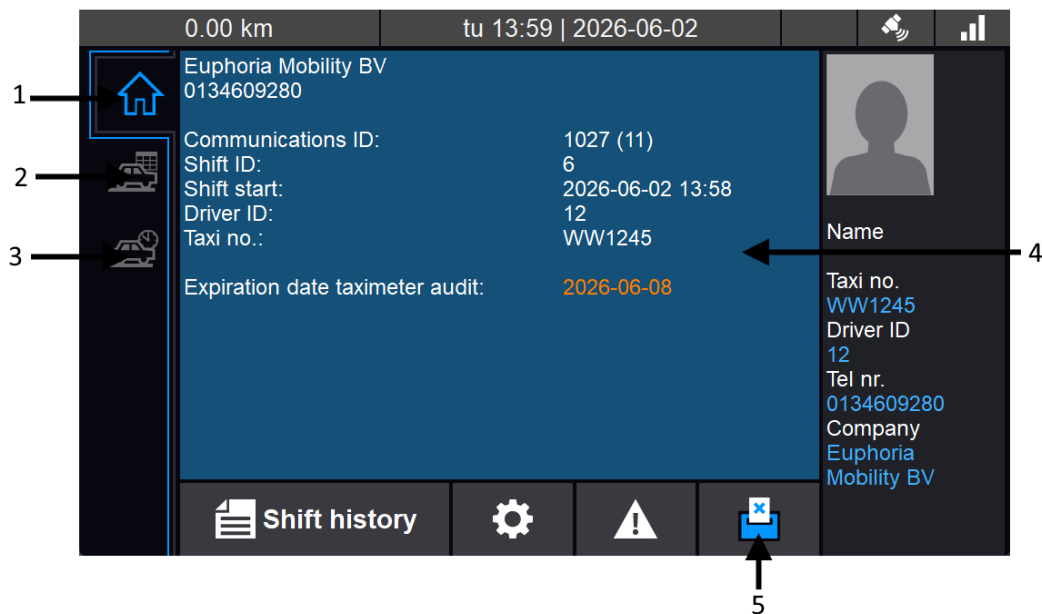

1. Mileage registered by the Novacab MDT since activation
2. Local time and date of the Novacab MDT
3. Indication symbol for GPS reception
4. Indication symbol for data communication reception
5. Login button to log in with driverid
6. Dashboard with info of the taximeter audit expiration date, this will only be visible if the audit is within 2 months
7. Status overview. Once logged in, a complete overview or only the current service can be seen here
8. [Settings](#) button
9. [Reports](#) button

Home tab logged out

After logging in, the home tab is as shown:

Home tab logged in

Here there are four new items:

1. Home tab button
2. Activities tab button
3. Taximeter tab button
4. Dashboard with info of the data communication ID, shift info, taxi number and the expiration date of the taximeter audit. The lateral will only be visible within two months of the audit.
5. Logout button

The Home tab is the default tab shown when starting the MDT. The following actions can be performed:

- Press [6] to [log in](#)
- Press [7] to open the [Reports menu](#)

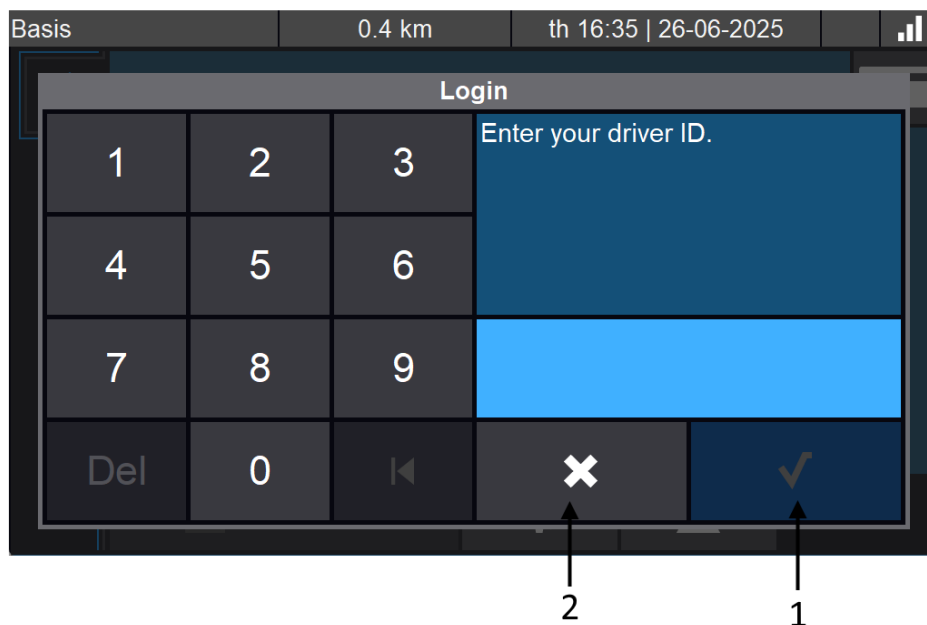

- Press [8] to open the [Settings menu](#)

The following action are only available after logging in:

- Press [4] to [log out](#)
- Press [9] to open the [Trip administration menu](#)

2.1 Logging in

After pressing the login button the login menu opens:

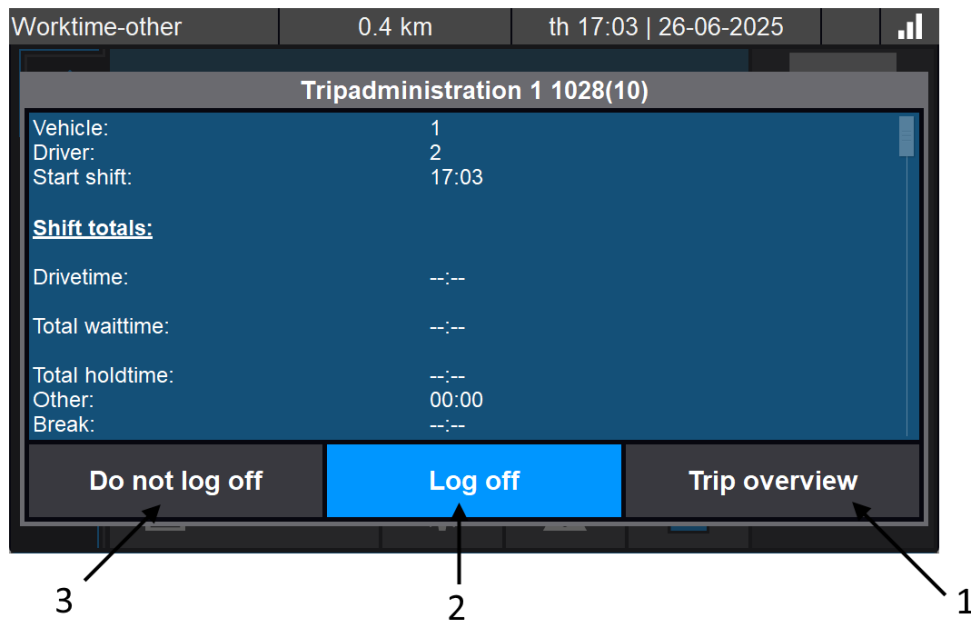

Login menu

1. After opening the login menu, enter your driver ID using the on-screen keypad
2. Press [1]
 - To cancel the login press [2]
3. On a successful login the [Taximeter tab](#) will be shown

A login can be performed by entering a smartcard into the reader located on the right side of the display.

2.2 Logging out

The log out menu is as shown:

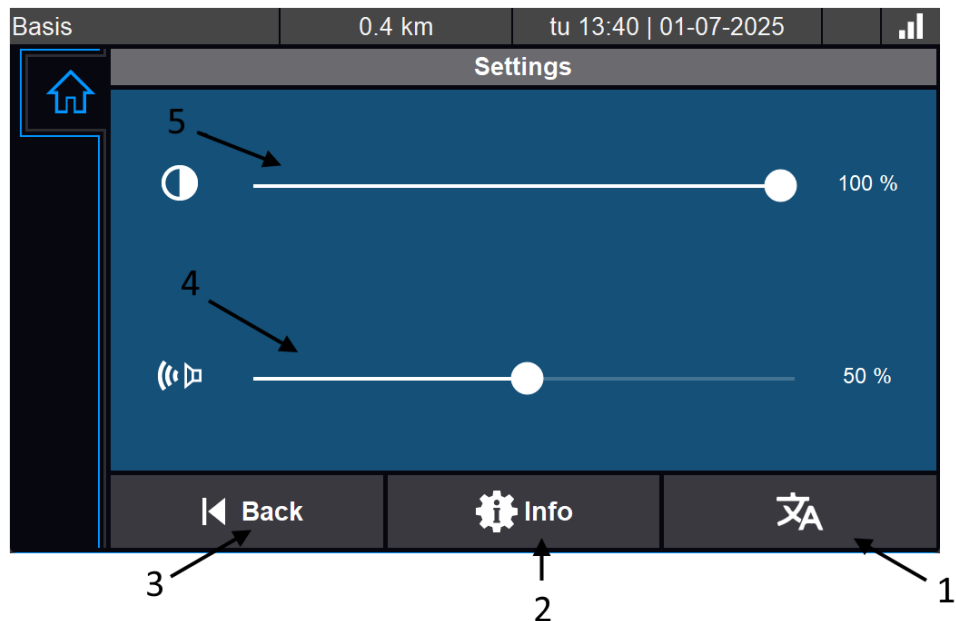

Log out menu

The following actions are available:

- Review the current shift information
- Press [1] to open the [Trip administration](#) menu
- Press [2] to confirm logging out
 - After pressing [2], press [**Yes**] to print the shift report
 - Otherwise press [**No**]
- Press [3] to stop logging out

2.3 Settings

Pressing the settings button will opens the settings menu:

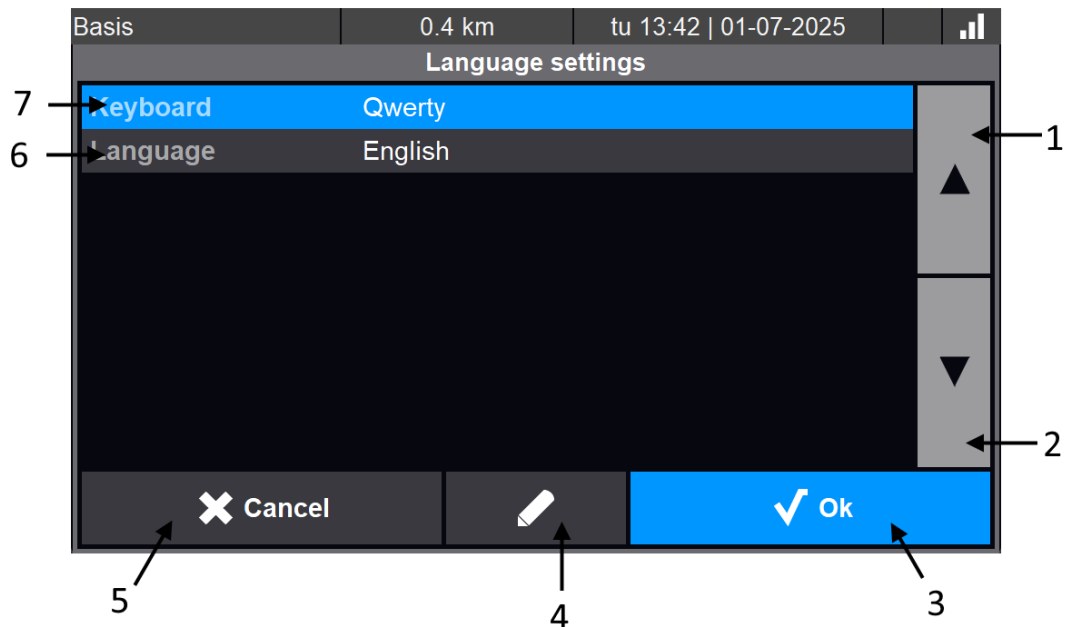

Settings

The following actions are available:

- Press [1] to open the [language settings](#) window
- Press [2] to open the [system information](#) window
- Press [3] to go to the home tab
- Adjust the volume slider [4] to set the volume
- Adjust the brightness slider [5] to set the screen brightness

2.3.1 Language settings

The language settings menu is as follows:

Language settings

In this menu the following actions can be performed:

Change keyboard layout

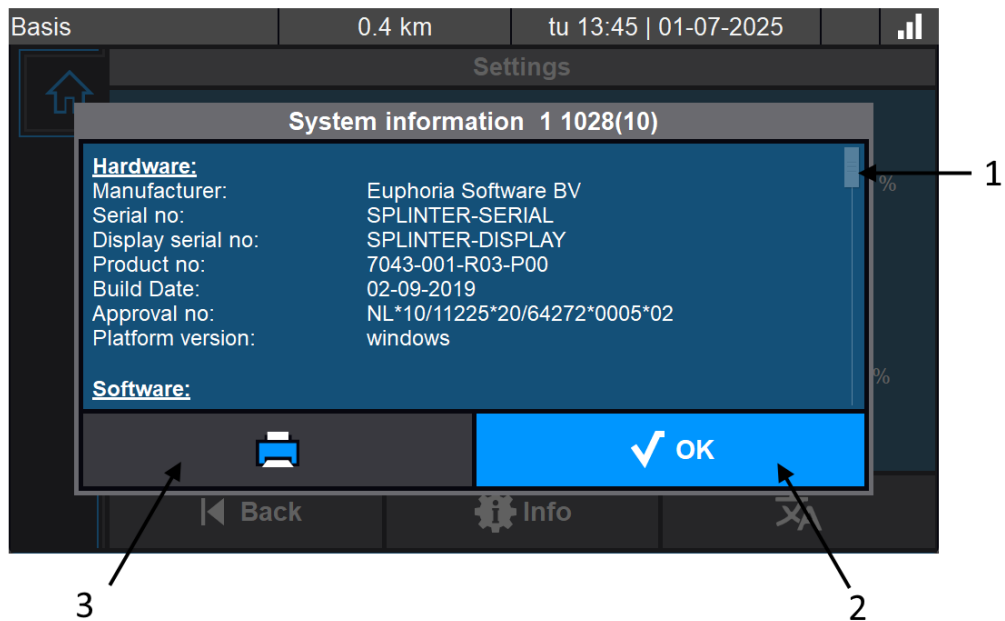

1. Press [7] or select **Keyboard** with the navigational buttons ([1] and [2])
2. Press [4] to open the Keyboard layout window
3. Select the desired layout
4. Press [3] to accept the new setting
 - Or press [5] to cancel the operation

Change system language

1. Press [6] or select **Language** with the navigational buttons ([1] and [2])
2. Press [4] to change the display language to the desired language
3. Press [3] to accept the new setting
 - Or press [5] to cancel the operation

2.3.2. System information

The system information menu is as follows:

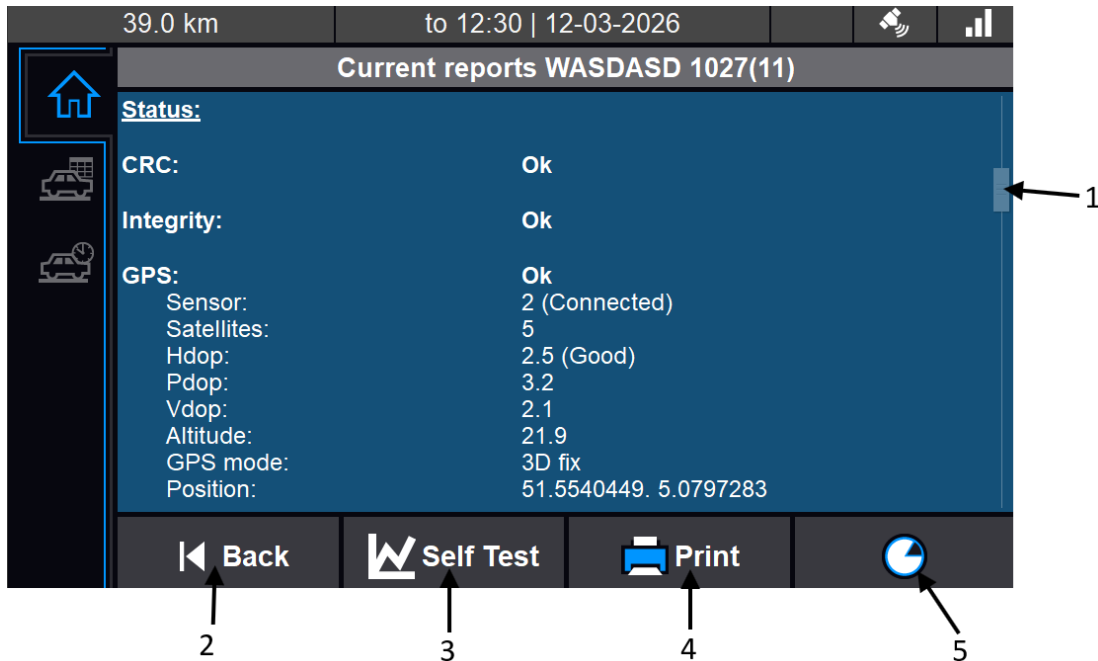

System information

View system information here. Drag the scrollbar [1] or the text to scroll through the information.

To print the system information press [3]. This will print the taxameterkontroll receipt. To close the window press [2].

2.4. Reports

The reports menu is as follows:

Reports window

In the reports menu the status of different components of the MDT can be inspected. The following actions are available:

- Scroll or use the scrollbar [1] to view all available information.
- To return to the home tab press [3]
- To open the [diagnostics test](#) window press [3]
- To print the report press [4]
- To open the [K-Factor test](#) window press [5]

2.4.1. Diagnostics test

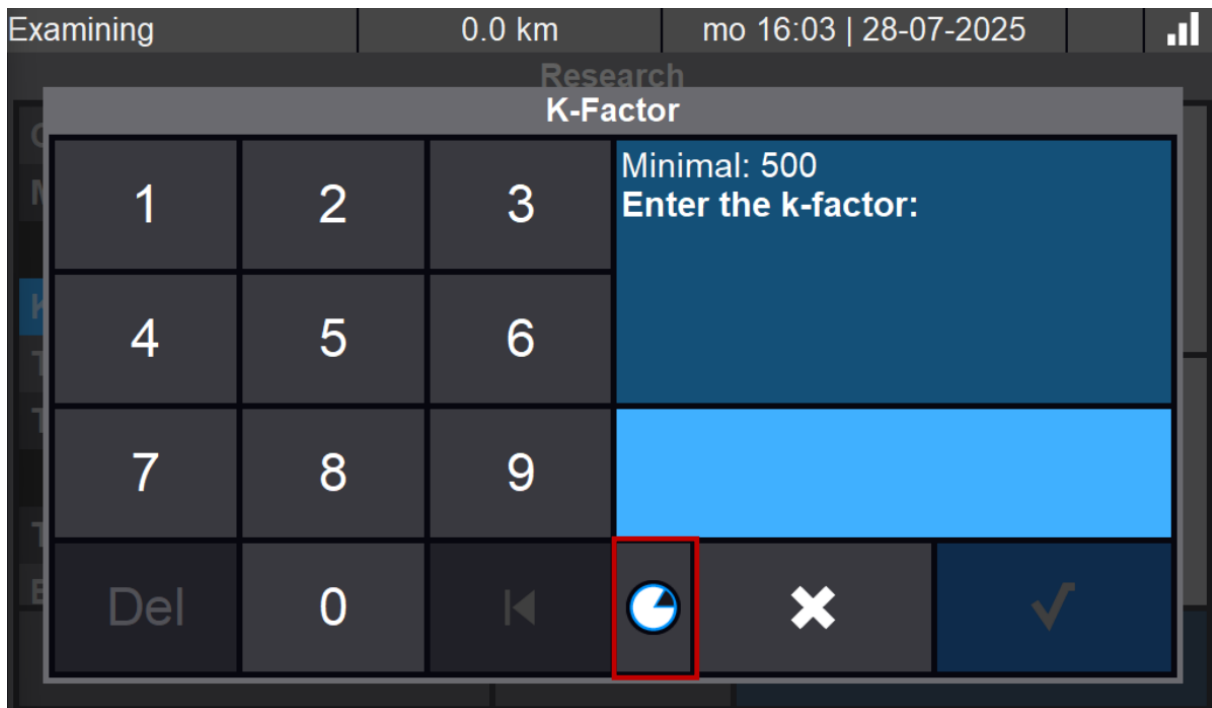

The self-test can be used to detect problems with the MDT display. The test is performed as follows:

1. Press the encircled area
2. Validate the color display
3. Scan the qr code to show the result
4. Press [**Complete**] to finish the self test

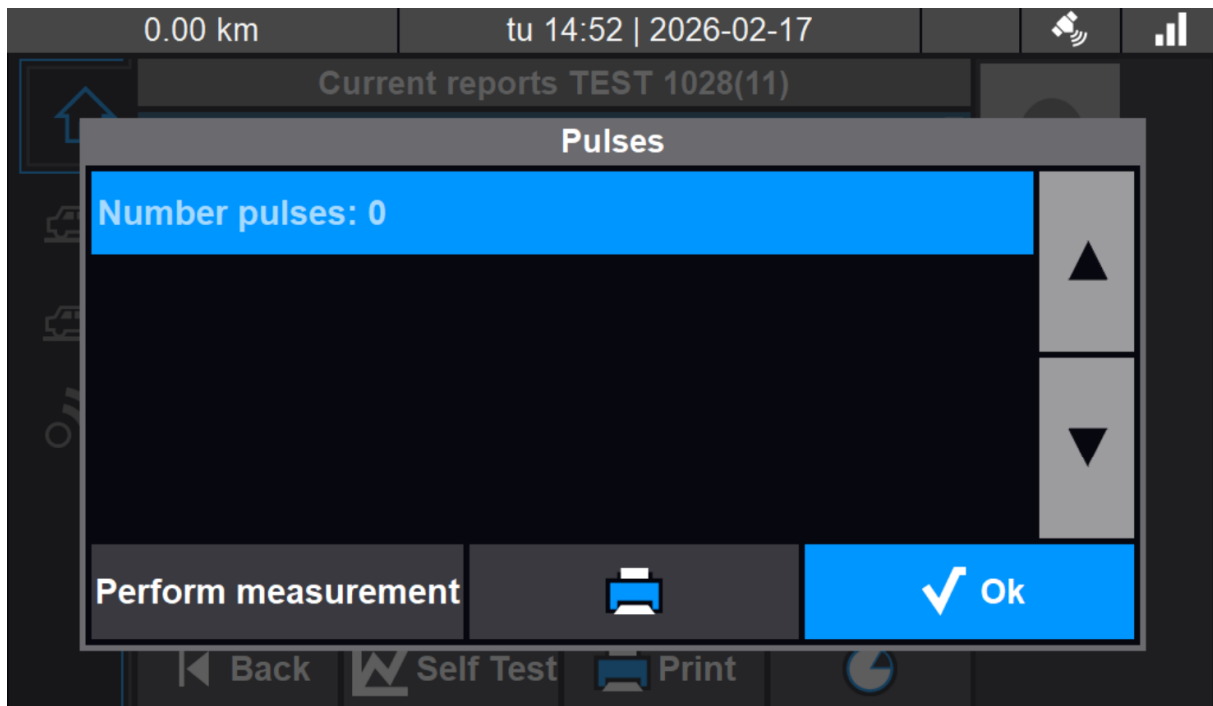

2.4.2. K-Factor test

Calibrating the Novacab MDT means finding and registering the pulses received per kilometer in the form of the K-factor. The K-factor is measured while driving.

A distance of 1 kilometer is used, and the K-factor is found by pressing the 'Perform measurement' button at the K-factor setup screen, see figure below.

The K-factor measurement starts immediately. See figure below. It is possible to start new measurements by pressing the “Perform measurement” button. A report can also be printed by pressing the print button. Press the “OK” button to stop measurements.

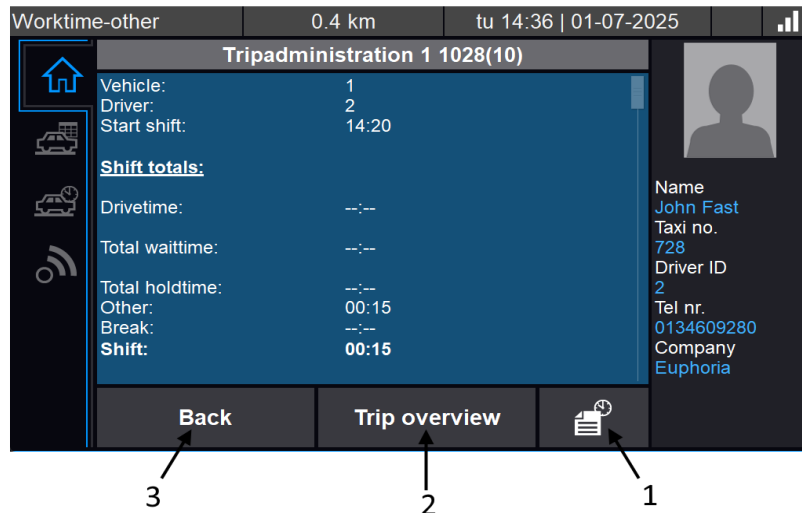

This gives a return to the screen shown in the first figure. Enter the number of pulses that correspond to one actual kilometer, and press the “V” button. The deviation of the K-factor measurement shall not exceed 3% (30 meters per kilometer), as specified in STAFS:2022-3.

In order to store this new value make sure to finish the examination.

2.5 Trip administration

The trip administration menu is as follows:

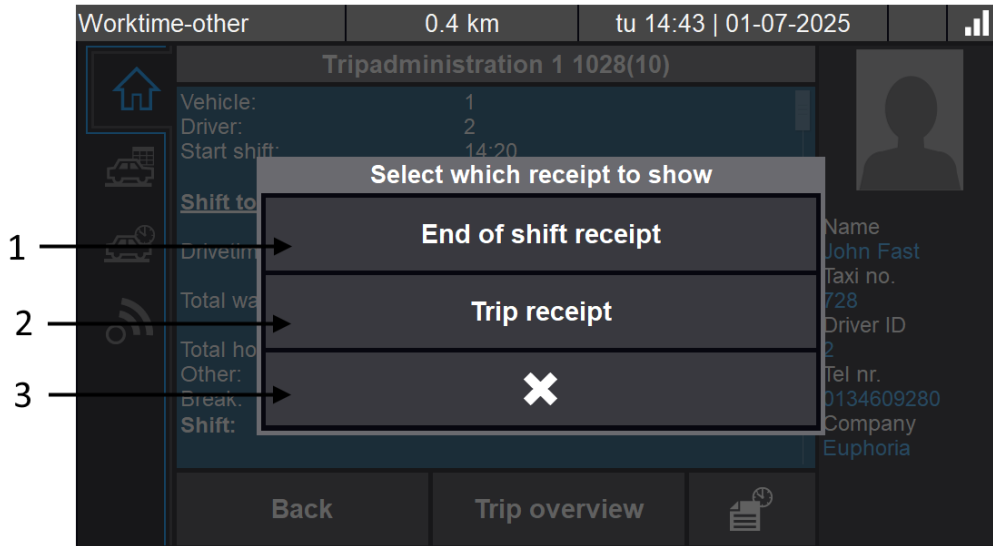

Trip administration menu

A summary of the current shift is shown on the main window. The following actions can be performed:

- Press [1] to [print previous receipts](#)
- Press [2] to [view activity information or print previous receipts](#)

 - Select an activity and press [**Ok**] to start it
3. Press [3] to exit the menu

4. Taximeter

The taximeter tab is used to start taximeter trips, and to view information about the current taximeter trip.

When there is no active trip, the taximeter tab is as shown:

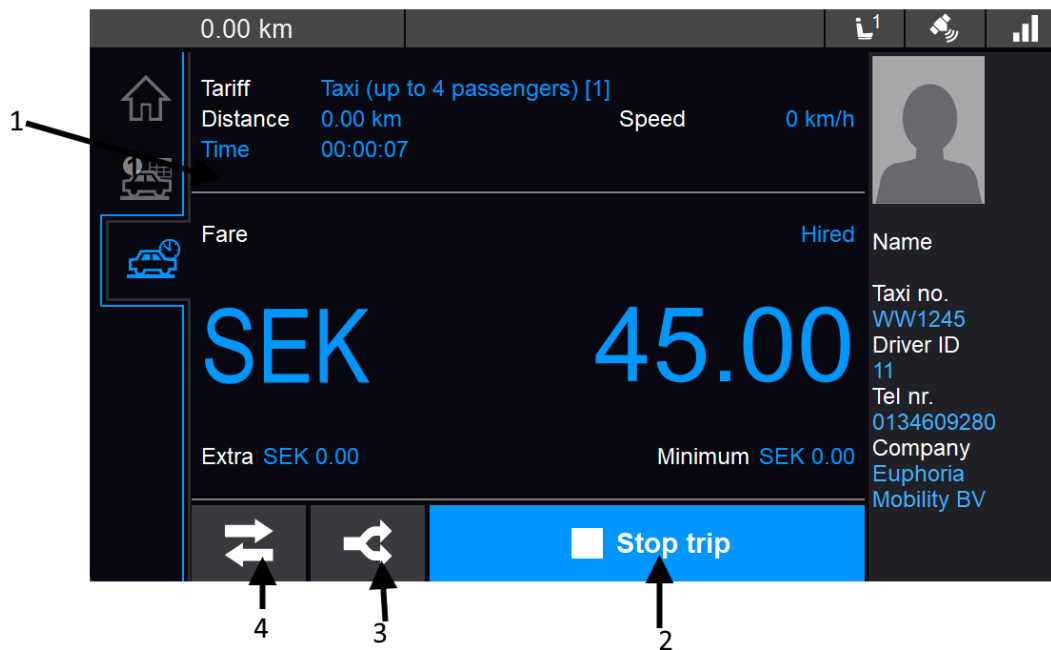

Taximeter tab inactive

The following actions can be performed:

- Press [2] to start the selected tariff from the tariff list [1]
- Press [3] to [start a fixed price trip](#) (and book as platform trip)

When a trip is started, the taximeter tab is as shown:

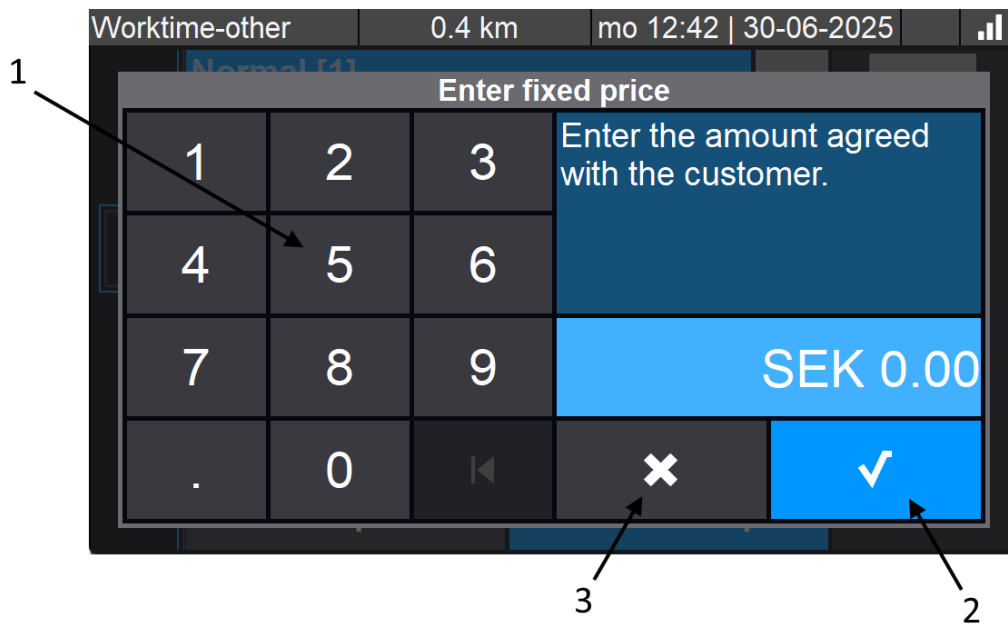

Taximeter tab active

Here information about the current trip is shown on the main display [1]. The following actions can be performed:

- Press [2] to [stop the current trip](#)
- Press [3] to [split the current trip](#)
- Press [4] to [change the tariff](#)

4.1 Starting a fixed price trip

When starting a fixed price trip, this can be used for platform trips, or any other trip where the price is fixed. The following menu is shown:

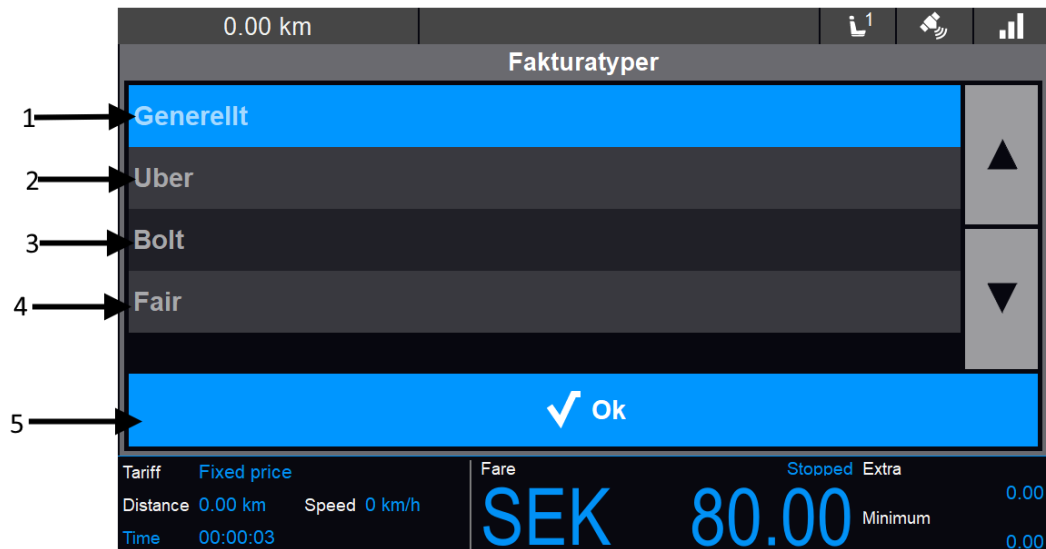

Fixed price menu

1. Enter the price using the number keyboard [1]
2. Press [2] start the trip
3. Press [3] to exit the menu

4.1.1. Booking a platform trip

When the fixed price trip is being used when driving a platform trip make sure to correctly book the trip. In the payment screen choose the option invoice this will show the following menu:

Invoice type menu:

1. Press [1] for a general invoice
2. Press [2] for a uber trip
3. Press [3] for a bolt trip
4. Press [4] for a fair trip
5. Press [5] to confirm the selection

4.2 Stopping an active trip

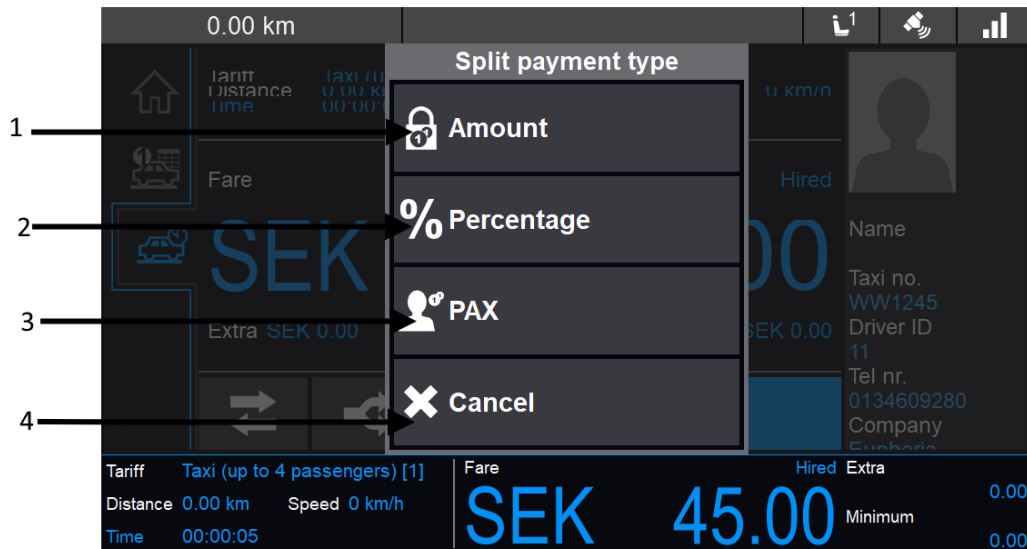

After pressing the stop trip button, a confirmation menu will be shown

- Press [**Yes**] to confirm stopping the trip
- Press [**No**] to exit the menu

Once confirmed, the [payment menu](#) will be shown.

4.3 Splitting trips

When in an active trip with multiple passengers and only some of them want stop their trip. It is possible to use the split trip function. After pressing the split trip button, the following popup will be shown:

Split trip popup

Here you can choose on how the fee is split. This can be done by:

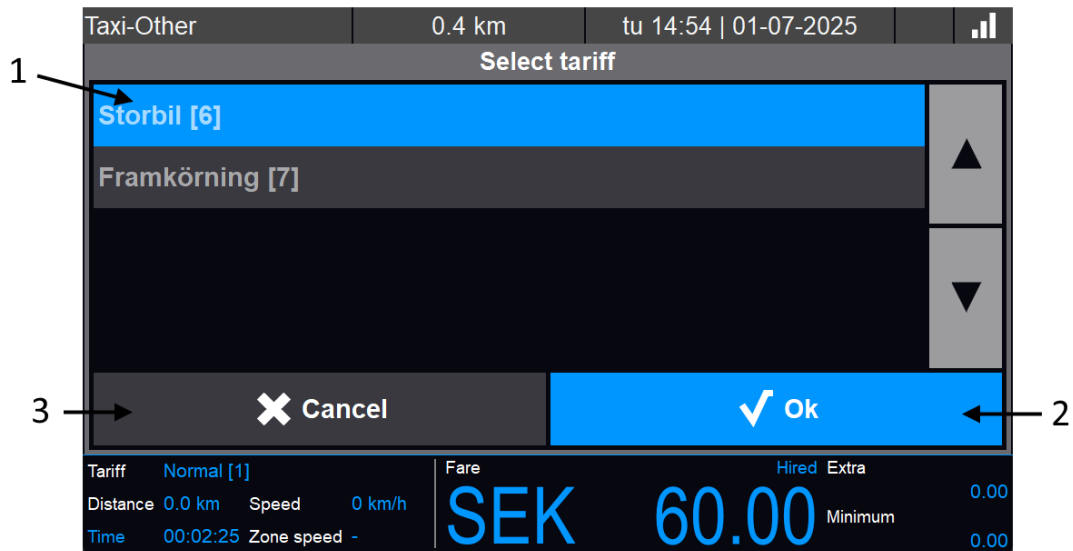

1. Amount. A flat amount will be deducted from the total fee
2. Percentage. Split the fee by a percentage
3. PAX, Split the fee evenly over the amount of passengers
4. Cancel this will go back to the taximeter screen.

After selecting the splitting method, the [payment menu](#) will be shown.

Note: When splitting a trip the current trip will be paused. After the customer has paid the trip must be resumed by pressing the pause / resume button.

4.4 Changing active tariff

The active tariff can be changed while in an active trip. This can be done from the change tariff menu. This menu is as shown:

Change tariff menu

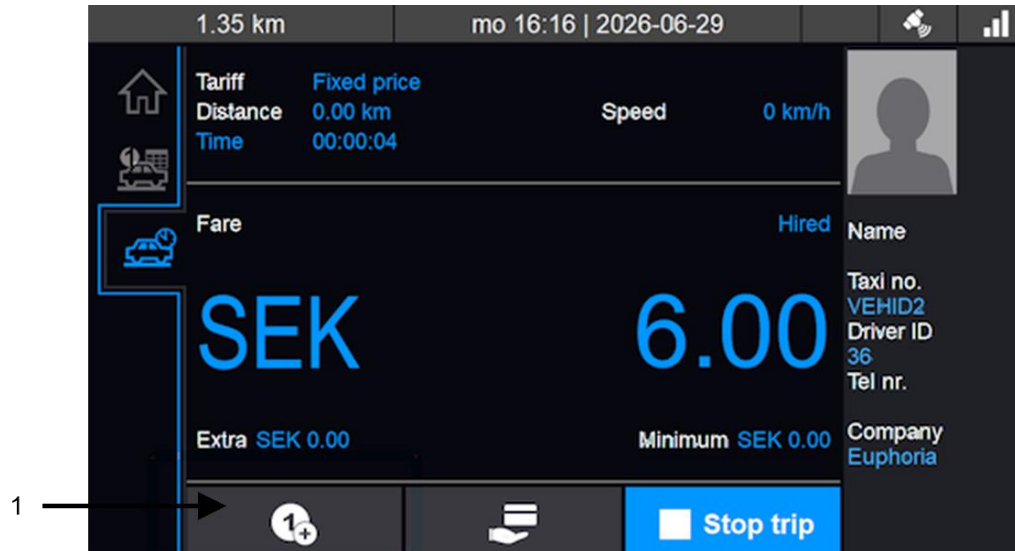

To change the tariff:

1. Select the desired tariff from the tariff list [1]
2. Press [2] to confirm the selection
3. Press [3] to exit the menu

Keep in mind the tariff can only be changed **while the tariff is not paused**.

4.5 Adjusting fixed price

The agreed fixed price can be adjusted while the trip is active, and in the payment menu after the trip has been stopped. During an active fixed price trip the adjust amount button is used:

Adjust amount button

1. Press [1] to open the adjust fixed price menu

The adjust fixed price menu is as shown:

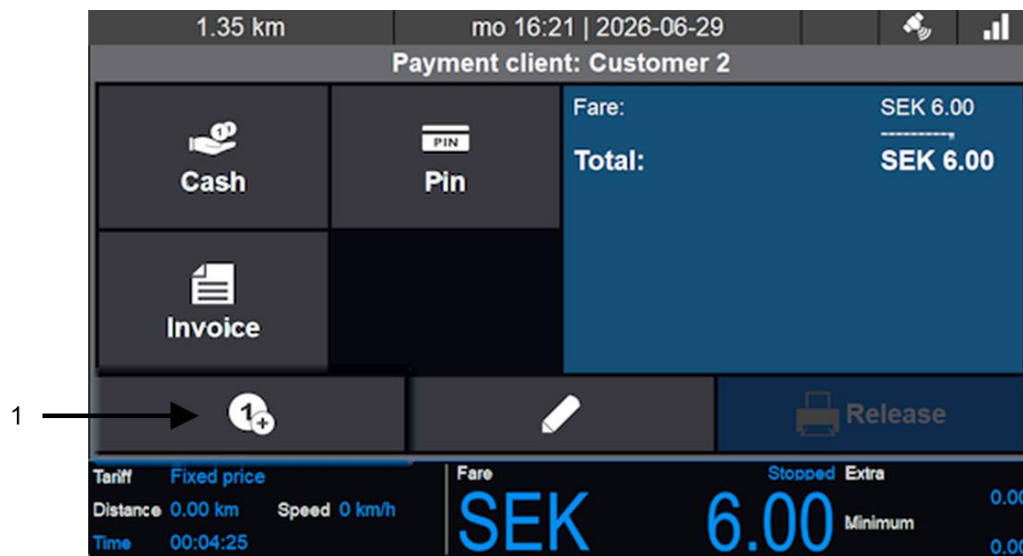

Adjust fixed price menu

1. Enter the new agreed amount with the number keyboard [1]
2. Confirm the new amount with [2]
3. Press [3] to exit the menu

The entered amount replaces the current fixed price. The trip continues with the adjusted price.

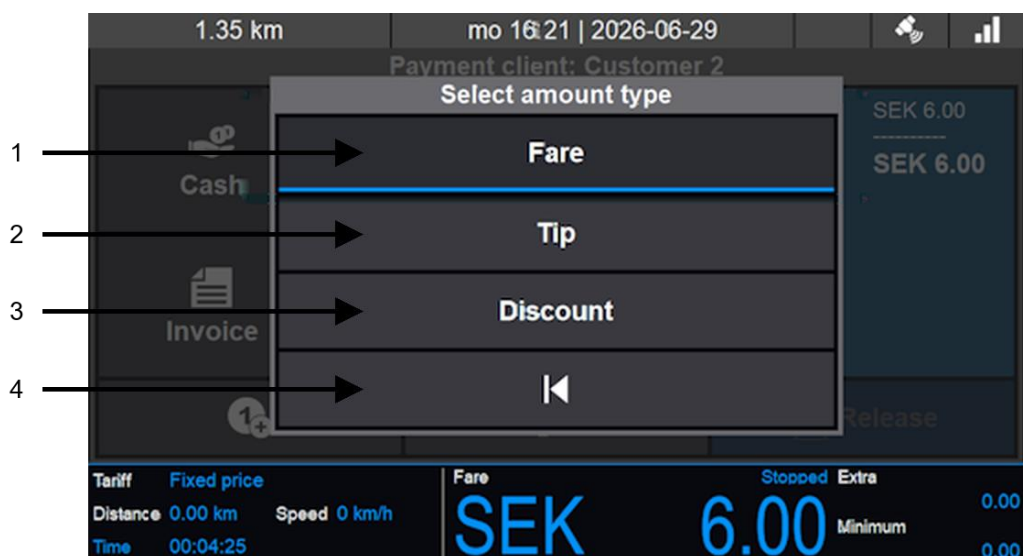

In the payment menu the fixed price is adjusted with the extra amount button:

Payment menu

1. Press [1] to open the select amount type menu

The select amount type menu is as shown:

Select amount type menu

1. Press [1] to adjust the fare
2. Press [2] to add a tip
3. Press [3] to add a discount
4. Press [4] to exit the menu

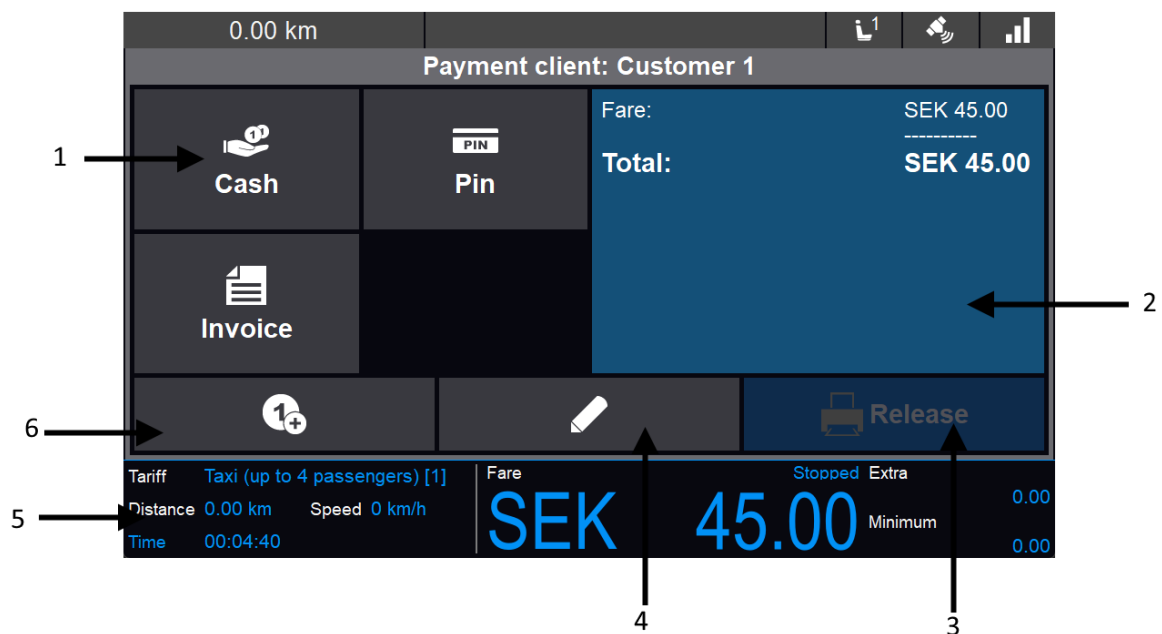

After selecting the fare, enter the new agreed amount and confirm. The total to be paid is updated with the adjusted fare.

Keep in mind the fixed price can only be adjusted on a fixed price trip.

5. Payment menu

The payment menu is shown when finishing a trip. The menu consists of the following elements:

1. Payment method selection
2. Fee tally
3. Complete payment button
4. Remarks button
5. Taximeter information menu
 - This tab is only shown on taximeter trips
6. Select extra payment options (tip / discount)

Payment menu

The following actions are available:

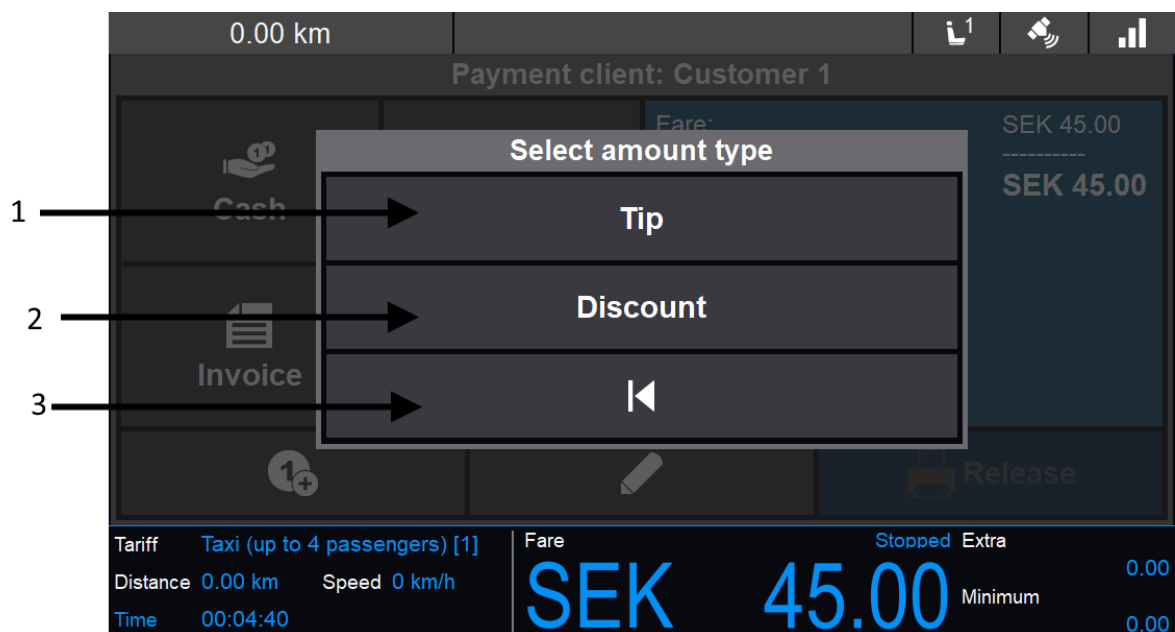

- Select the payment method from [1]
- Press [3] to [complete the payment](#)
- Press [4] to add a remark to the payment
 - This remark will be shown on the receipt
- Press [5] [to edit payment details](#)

5.1 Completing payments

To finish a transaction, press the release button. To print the receipt, press [**Ok**].

5.2 Editing payment details
