4. MyPOS	7
5. Simcards	8

1. Introduction

This document provides a complete overview of how to get started with Cabman Control and how to configure the Cabman MDT for your customers. Cabman Control is our platform designed specifically for installation partners. The aim of this manual is to give you a thorough understanding of the product and how to use it correctly.

Once you have sold and installed a Cabman MDT, all you need to do is configure it. That's where Cabman Control comes in. You log in to www.cabmancontrol.com with your login credentials and with the help of this user guide you can get your MDT up and running in no time!

There are several tabs in your Cabman Control portal that you can choose from. These are the following:

Tabs	
Licences	To create and download a license regarding the Cabman MDT
Configures	To download a customer specific configurations
Mypos	To pair a Myposdevice with a TID.
Simcards	To Activate a Simcard

Let's get started! Do you have questions about this manual? Please contact our local partner Espen Thorsen by e-mailing: es-th@online.no.

2. Licences

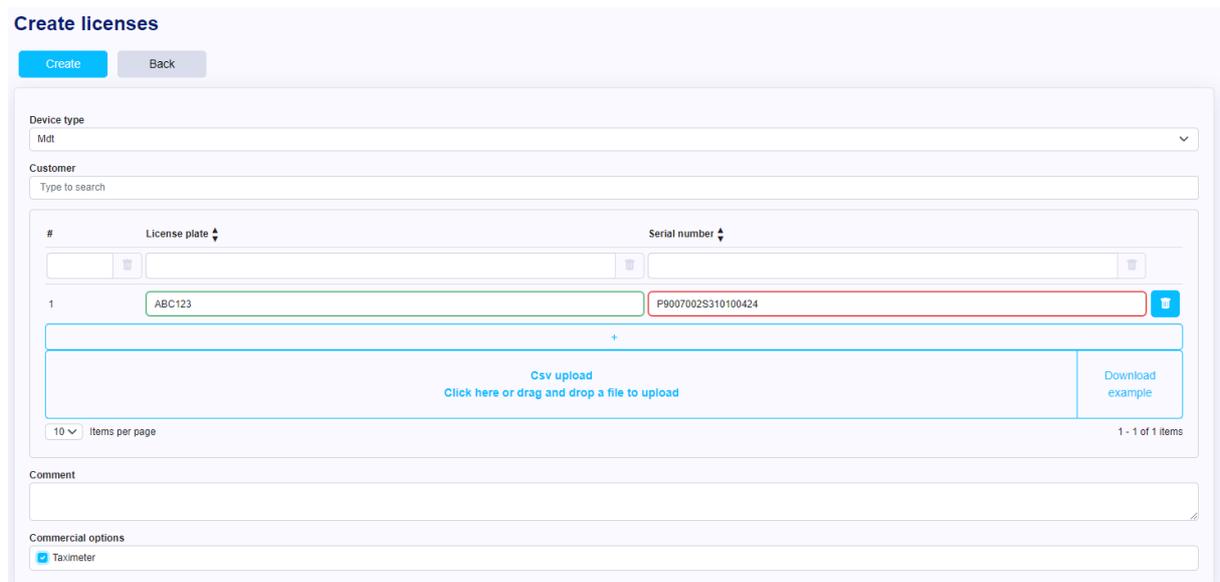

Let's start with the first tab in Cabman Control: Licences. Each Cabman MDT needs a licence to get it working. It's also needed to get the taximeter operating. The licence is just a file that you need to put in the Cabman MDT.

How to create a new licence?

1. Create a new licence by clicking on the blue 'Create' button

2. When you click on this button, you will be taken to the page shown below. On this page you'll need to enter some information, such as the serial number of the MDT and the registration number of the vehicle in which you're installing the MDT.

On the licensing page, there are a number of mandatory fields, such as

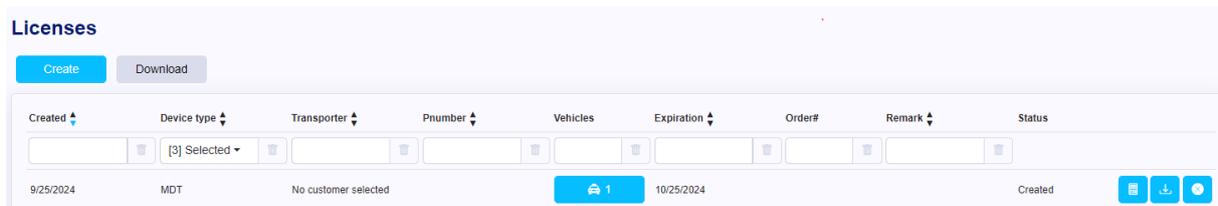

- Licence plate (of the vehicle you are installing the Cabman MDT)
- Serial number (of the Cabman MDT Box)

There are also some optional fields, such as:

- Customer (To connect this installation to a particular customer)
- Comment (To give some extra information for your own administration)
- Taximeter (If the integrated Taximeter module is needed)

Want to enter multiple serial numbers at once? That's possible too! You can upload a CSV file and Cabman Control will automatically copy the correct information into the correct files. Not sure how to do it? There is an example file that you can download by clicking on the 'Download example' button.

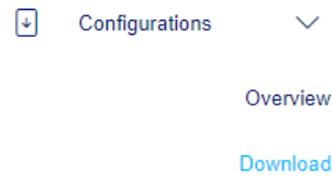

3. Once you've entered all the necessary information, click on the blue 'Create' button. The licences will now be generated.
4. You will be returned to the Licences page and can now download the licence by clicking on the 'Download' button in the overview screen.

3. Configurations

Once you have created and downloaded the licence, you will need to download the configuration to install on the Cabman MDT for this customer.

1. Start by clicking on the "Download" option in the left menu under "Configurations".

2. Find the correct configuration by selecting the customer name. Once you have found the right name, press the blue button with 'Select' next to it.

3. You'll be taken to the 'Download Configuration' page. There are two mandatory fields on this page:

- Licence plate (of the vehicle you are installing the Cabman MDT)
- Serial number (of the Cabman MDT Box)

There's also an optional field:

- Comment (To add some extra information for your own administration)

Want to enter multiple serial numbers at once? That's possible too! You can upload a CSV file and Cabman Control will automatically copy the correct information into the correct files. Not sure how to do it? There is an example file that you can download by clicking on the 'Download example' button.

Download Configuration

Select a configuration:

Device type
MDT

Configuration
NOR-OSLOTAXI

Release
NOR-MDT-MS2-1.3-22D37B2D-2024-05-29-CRC-ABE674BF

Comment

#	License plate	Serial number
1	ABC123	P9007002S310100424

[Csv upload](#)
 Click here or drag and drop a file to upload

[Download example](#)

10 Items per page 1 - 1 of 1 items

4. Press 'Download' and the configuration file will automatically be downloaded to your local download folder on your computer. It is also possible to download the update by pressing the 'Download' button on the configuration overview page (centre box).

Configurations

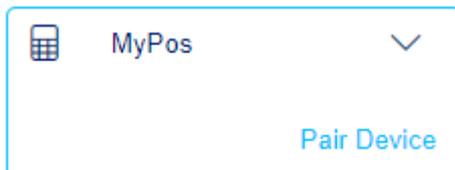

[Download](#)

Created	Configuration name	Vehicles	Language	Release	Layers	Order#	Status
9/25/2024	NOR-OSLOTAXI	1	English, Norwegian	NOR-MDT-MS2-1.3-22D37B2D-2024-05-29-CRC-ABE674BF	NOR		Created

4. MyPOS

Does your customer use a myPOS payment terminal? Then you can also configure the device in Cabman Control. This works as follows:

1. Go to the myPOS page and press “Pair Device”

2. Enter the TID and currency, then press the blue button with ‘Pair’ on it.

Pairing device

TID*
90411344

Currency*
NOK

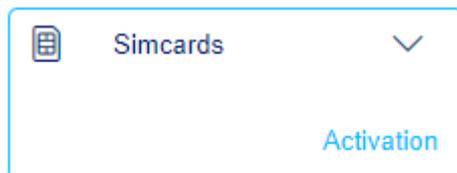

3. Cabman Control will then generate a code. You must enter the generated code into the myPOS terminal. Your terminal will then be paired.

Want to unpair a device? Simply enter the TID and currency and press "Unpair".

5. Simcards

Last but not least, you need to activate the simcard in the Cabman MDT. You can also do this using Cabman Control.

1. Go to the 'Sim Cards' tab as shown below and press 'Activate'.

2. You'll then be taken to a new page. Enter your "SIM number" and press the blue "Activate" button to activate your SIM card.

Activate or check M2M simcard

SIM number*

89882390000479216844

3. Do you want to check if the SIM card is already in use? Enter the "SIM number" and press "Check".
