

Step by step plan to enable TT-card in Cabman MDT

1. Request TT-card onboarding

The customer notifies Qtech they want to accept TT Card as a payment method with their Cabman MDT.

2. Submit business details to Rogaland Taxi

Send an email to kreditt@rogaland-taxi.no (cc: Qtech) including

- a. Central name
- b. Organization number
- c. Overview of taxi license(s)
- d. Bank account number of central
- e. Email address for receiving credit lists

3. Approval and credentials

Upon approval, Rogaland Taxi sends login credentials (username and password) to the customer.

4. Hand over credentials to Cabman operations

The customer (or Qtech) must create a Zendesk ticket to Cabman operations (support@cabman.zendesk.com) and attach the credentials. Credentials must **only be shared** via the Zendesk ticket system, which provides a secured environment. Do not send credentials via email.

5. Install and configure card readers (workshop)

The workshop installs the reader(s) on the Cabman MDT.

6. Remote configuration and update

Cabman operations schedules and pushes an update to the Cabman MDTs to enable TT-card.

7. Validation test (Customer and Qtech)

Perform one low-value test transaction on the Cabman MDT. Ask Qtech to confirm the transaction is visible and correctly recorded in the TT-card system (Rogaland Taxi).

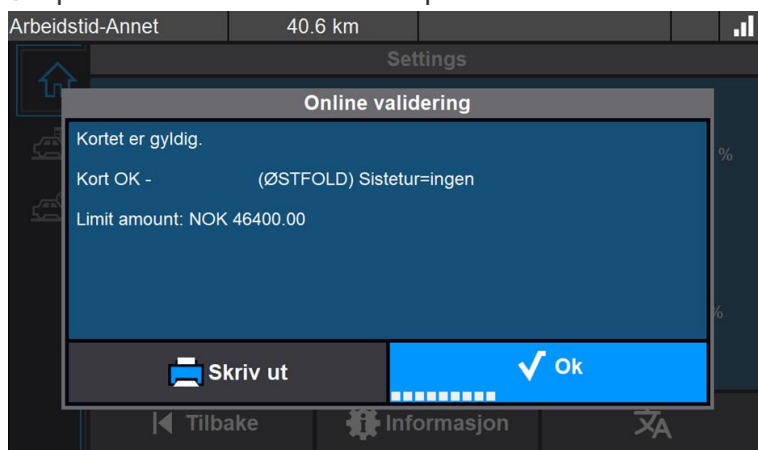

8. Go-live

After successful validation, begin accepting TT-card on Cabman MDT.

How to use TT-card in Cabman MDT

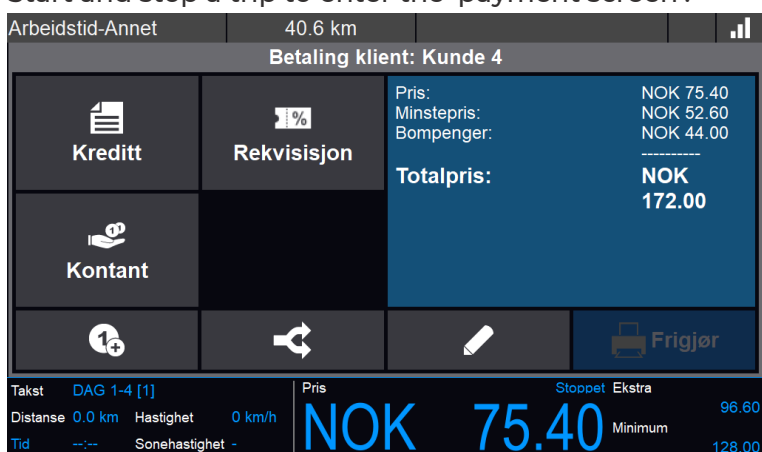

Check balance

1. The driver can check the balance of the TT-card before and during a trip.
2. Swipe the TT-card with the swipe card reader.

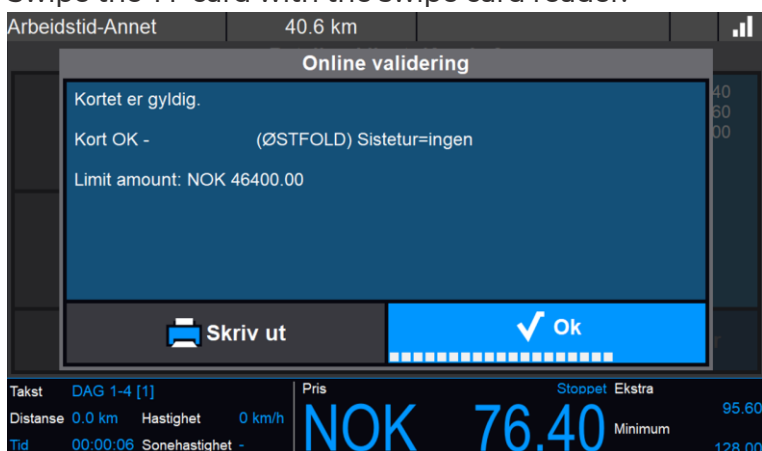

Pay with TT-card

1. Start and stop a trip to enter the 'payment screen'.

2. Swipe the TT-card with the swipe card reader.

3. The Cabman MDT will contact the TT-card system and handles the payment.
